

KnowledgeScape Product Road Map

This product roadmap is indicative of tentative release schedules. It is subject to change.

Release 7.0 (Available Now)

- New Object Engine (VisualWorks 7.3)
- Gemstone 6.1.4
- New KS to GemStone communications (Gbs 6.1)
- New KS data encoding (10x speed improvement for KS trends)
- Bug Fixes
- New Distributed Computing Control Center (based on web services, eliminates the need for the KSRpcService and the portmap service).

Release 7.1 (February 2006)

- New Inference Engine Architecture (to better take advantage of multiple processor machines)
- Particle Swarm Optimizer
- Headless Version (Runs and Windows Service)
- Multiple Instances Per Computer
- Re-designed Auto-Start Manager to support multiple instances

Release 8 (September 2006)

- New Process Drawing
- New System Browser (Integrated System-wide configuration tool)
- Particle Swarm Training of Neural Networks
- Radial Basis Function Neural Networks (Classification Networks)

Release X (January 2007)

- OPC UA support (subject to OPC Foundation release)
- Linux Support
- 64 Bit Support for 64 bit platforms
